

Molécules - Forme dermique

		Lidocaine hydrochloride			Tetracain hydrochloride
		Morphine hydrochloride			Morphine sulfate
		Oxycodone hydrochloride			Azithromycine
		Nalidixic acid			Polyhexamethylene biguanide
		Chlormethine hydrochloride			Erlotinib
		Amitriptyline hydrochloride			Gabapentine
		Voriconazole			Desoximetasone
		Diclofenac			Flucinonide
		Hydrocortisone 17 valerate			Ketoprofene
		Mometasone furoate			Nimesulide
		Piroxicam			Triamcinolone acetonide
		Timolol maleate			8-methoxypsoralen
		Arnica tincture			Baclofen
		Benzoyl peroxyde			Dithranol
		Marigold tincture			Resorcinol
		Tretinoin			Calcium gluconate
		Estradiol			Estriol
		Estrone			Gestrinone
		Progestérone			Testostérone
		Ciclosporin			Sirolimus

Epinephrine hydrochloride

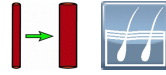

Minoxidil

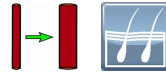

Nitroglycerin

Diltiazem hydrochloride

Nifedipine

Pentoxifyllin
